SUMMARY

Software Engineer with 3 years of experience building scalable solutions across BFSI, fintech, and capital market domains. Experienced in full-stack development, system design, and development of High Frequency Trading applications. A quick learner with strong ownership, adaptability, and a passion for solving business problems.

WORK EXPERIENCE

Clover Infotech Pvt Ltd (Banking and Insurance domain) **Mumbai**
Software Engineer **Jan 2025 – Present**

- Collaborated onsite with the bank's team to migrate the legacy website optimizing page load time and streamlining user journeys through effective coordination with QA and backend developers.
- Facilitated domain migration to achieve seamless transition and near-zero downtime during deployment.
- Resolved multiple breaking user journeys across key modules such as Debit Card, Forex, Credit Card, Gold loan renewal, FATCA, Remittance, and Loan on Card.
- Improved system stability and maintainability by identifying and fixing critical integration and workflow issues on production environment and delivering expected outcomes as per the business requirements.
- Coordinated application and content migrations across UAT and Staging environments as part of release management activities while maintaining customer-facing SME web pages using Sitefinity CMS.
- Assisted QA and cross-functional teams in resolving complex Git branching, merge conflicts and release workflows.

Nerve Solutions (fintech/capital markets domain) **Mumbai**
Software Engineer ***July 2023 - Oct 2024***

- Developed and maintained a futures and options trading platform for India's largest finance bank.
- Efficiently collaborated and delivered quality code in 2 different projects simultaneously maintaining clean code.
- Independently Researched, implemented and tested client-side requirements of communication bridge for Flutter and Nodejs improving clients team productivity by 50%, resulting in a streamlined workflow for new feature integration of Clever Tap to get better insights of end-users' actions, demonstrating strong initiative.
- Proactively Adapted, Optimized option chain to reduce app load time achieving 40% increase in overall app performance, Deployed releases to UAT meeting customer design requirements and met tight project deadlines consistently through effective time management, ensuring on-time delivery and client satisfaction.
